

AMENDMENT OF THE DRAWINGS

Applicant is submitting seven sheets of Replacement Drawings. Applicant has amended Fig. 10 and added sheet 7 with new drawings bearing Figs. 15 and 16. The Replacement Sheets are otherwise the same as the original drawings.

The amendment of Fig. 10 adds the reference numbered 25 for the foils in the stack, and brings about a correspondence of the drawing with corrections to Paragraph [0017] in the specification.

Sheet 7 of the Drawings bears new Figs. 15 and 16 which illustrate the alternate embodiments described respectively in Paragraphs [0017] and [0019].

The illustration of the alternate embodiment in Fig. 15 is based upon Examiner's objection set out in the Office Action of April 21, 2009, page 2, to Applicant's election of "not-shown sub-species" defined in claim 5. Although Applicant is electing another species, the addition of Fig. 15 is made for compliance with 37 CFR 1.83(a). Similarly, Applicant is illustrating in Fig. 16 the alternate embodiment described in Paragraph [0019] that also defines the subject matter of claim 5.

Applicant has been careful not to introduce new matter in the new drawings.
